CARESERVICES · HOME SLEEP STUDIES

Professional Type II & Type III sleep recordings

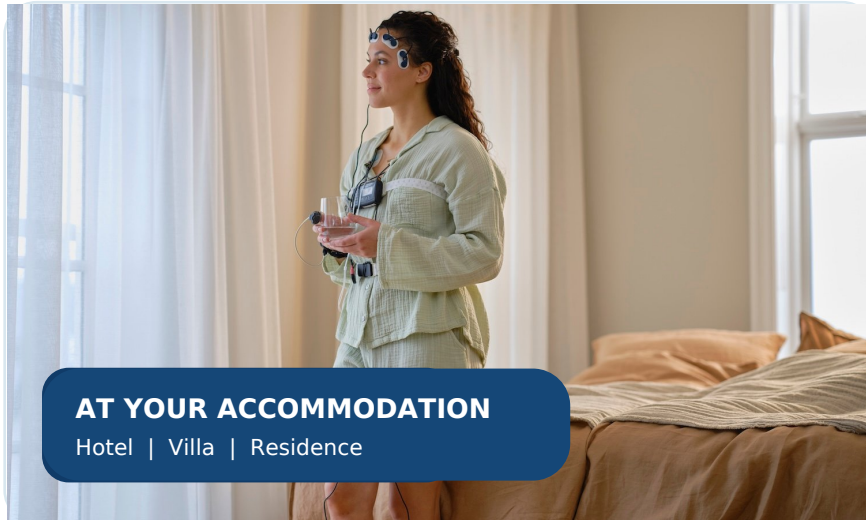

At the guest's hotel, villa or residence · Professional setup and technical support

Medical interpretation and report provided by the treating or collaborating physician

+30 694 569 8776 | premiumcarecrete@gmail.com | premiumcarecrete.gr | careservices.gr

What We Can Assess During Sleep

Type II and Type III home sleep studies provide objective information about breathing, oxygenation and sleep quality in the comfort of the guest's accommodation.

AT YOUR ACCOMMODATION

Hotel | Villa | Residence

careservices

HOME SLEEP STUDIES

TYPE III

Advanced respiratory sleep recording

TYPE II

Full polysomnography including sleep stages

Professional setup and technical support

BREATHING & OXYGEN

- Apneas, hypopneas and airflow
- Thoracic and abdominal effort
- Oxygen levels and desaturations
- Snoring and body position

SLEEP STRUCTURE

- Sleep stages: N1, N2, N3 and REM
- EEG brain activity and arousals
- Sleep fragmentation and efficiency
- REM / NREM patterns

ADDITIONAL SIGNALS

- Heart rate and ECG, when included
- Eye movements and muscle activity
- Bruxism indicators
- Periodic limb movements and activity

Findings that may support medical evaluation

Obstructive sleep apnea, nocturnal oxygen desaturation, snoring, bruxism, sleep fragmentation, REM / NREM disturbances and periodic limb movements.

The appropriate study type and sensor configuration are confirmed according to the clinical request.

IMPORTANT CLINICAL NOTE

CAREservices provides the technical recording service. Medical interpretation, diagnosis and treatment decisions are provided exclusively by the treating or collaborating physician.
